## A multidisciplinary team of spine & pain specialists, improving spine care with outcomes tracking & an informed patient

Four out of five Americans will have an attack of back pain during their lifetime. Many people are doomed to endless visits to the back doctor. That's because once you experience your first symptoms of back pain, you are four times more likely to have a recurrence. That's the bad news.

Now for the good news. Melding the expertise of fellowship-trained spine surgeons, cutting-edge pain management techniques and over thirty years of patient-centric compassion and care, Precision Spine Care is a leader in spine medicine and restoration. Led by renowned spinal surgeon, Dr. Charles Gordon and renowned interventional pain management physician, Dr. Aaron Calodney, the PSC team is a world-class group of deeply empathetic physicians on the forefront in minimally invasive precision spinal surgery, interventional non-invasive procedures, stem cell & bio

therapeutic medicine and the exciting frontier of spine research.

Precision Spine Care takes a dedicated, multi-disciplinarian approach to treating those suffering from spinal pain and injuries, offering a comprehensive scope of medical offerings such as anesthesia, pain management and rehabilitation. The PSC team is your partner, from initial consultation to diagnosis, to non-invasive or invasive procedure, to healing and follow-up. We will be with you every step of the way, making sure your care is all about you, all of the time. We make it a point to see anyone right away who is hurting or in significant discomfort. Our care is unequivocal.

With 11 highly trained and honored physicians and an additional 11 medical providers, Precision Spine Care stands ready to give you exemplary service, coupled with the absolute

best in spinal care and pain management. Our state-of-the-art regeneration therapy (biologic therapy), coupled with a tailored care that always seeks first for a non-invasive approach, is here to meet your specific needs. Roseland Pharmacy, a full-service, compound pharmacy within our practice, is able to meet all of your prescription needs, offering compound pain creams and scar creams as an alternative to oral medicines. We are unrelenting in finding the best, specific approach that works best for you.

Serving the entire East Texas region, Precision Spine Care is here for you. Our greatest satisfaction is derived from bringing relief and healing to your spine, neck and joint issues.

By combining spine and pain specialists, Precision Spine Care now meets the credentialing criteria to be

**Neurological Spine Surgeons**

**Charles R. Gordon, MD**

Board-certified Neurological Surgeon  
Fellowship-trained in spine

Dr. Gordon is a board-certified neurosurgeon known as a leading advocate in research for the spine. He is an expert in minimally invasive spine surgery and stem cell (from the patient's own body), as well as other biologic advances. He's also on the front line of utilizing early genetic detection of potential spine and neurological problems. Dr. Gordon is the founding chairman of the Texas Joint & Spine Hospital, a highly respected hospital with a growing national reputation.

**Alan Muns, MD**

Neurological Surgeon, Fellowship-trained in Complex and Reconstructive Spine

Dr. Muns is a neurosurgeon with fellowship-training in Complex and Reconstructive Spine at University of Texas - Houston / FOARR (Foundation for Orthopedic, Athletic and Reconstructive Research). He next earned his MD at the Texas Tech University School of Medicine. Dr. Muns completed a surgical internship at University of Texas - Southwestern before completing his neurosurgical residency at University Texas Medical Branch. Dr. Muns is a member of the American Association Neurological Surgeons, Congress Neurological Surgeons, the North American Spine Society and other professional organizations.

**Andy J. Redmond, MD**

Board-certified Neurological Surgeon

Dr. Redmond is a board-certified neurologist who treats back and neck pain and disorders of the brain. He completed his surgical training at Yale University. Dr. Redmond strongly believes in an evidence-based practice and conquering pain with minimally invasive techniques. Dr. Redmond thinks the future of pain management is bright. "We are moving away from spinal hardware into the exciting area of cellular and genetic treatment for brain and spine disorders."

**Non-surgical Spine Care**

**Jonathan Blau, MD, FIPP**

Board-certified Physical Medicine and Rehabilitation

Board-certified Electrodiagnostic Medicine, Board-certified Pain Medicine, Fellowship-trained Interventional Pain Management  
Dr. Blau is board-certified in Physical Medicine and Rehabilitation (PM&R), Electrodiagnostic Medicine and Pain Medicine. As a specialist in PM&R, Dr. Blau's focus is to restore function and quality of life to patients suffering from disorders and injuries of the nerve, muscle, spine and joints. Dr. Blau is specialty-trained in performing fluoroscopically guided disc and joint injections and electromyography (EMG) / nerve conduction studies. Dr. Blau has a special clinical interest in non-surgical treatments of spine and joints, botulinum toxin (Botox) injections for special pain conditions.

**Ellisiv Lien, MD**

Board-certified Physical Medicine and Rehabilitation

Dr. Lien is board-certified in Physical Medicine and Rehabilitation (PM&R). As a specialist in Physical Medicine and Rehabilitation, Dr. Lien's focus is to restore function and quality of life to patients suffering from disorders and injuries of the nerve, muscle, spine and joints. Dr. Lien is specialty-trained in performing electromyography (EMG) and nerve conduction studies (NCS). Dr. Lien has a special clinical interest in non-surgical treatments of spine and joints, electrodiagnostic studies to diagnose muscle and nerve injuries, botulinum toxin (Botox) injections for spasticity, cervical dystonia and chronic migraines.

**Pain Management**

**Aaron K. Calodney, MD, FIPP**

Board-certified Anesthesiology & Pain Management, Fellowship-trained Interventional Pain Management

Dr. Calodney has particular interest in spine. His special interests include neuromodulation and intrathecal drug delivery, biological treatment of the painful degenerative disc, peripheral nerve injury, and radiofrequency ablation. Dr. Calodney is current President of the American Society of Interventional Pain Physicians (ASIPP). He is a lecturer and examiner for the American Board of Interventional Pain Physicians (ABIIPP), and the Fellow of Interventional Pain Practice (FIPP) certifying examinations.

**Erik Fite, MD, FIPP**

Board-certified Anesthesiology & Pain Management, Fellowship-trained Interventional Pain Management

Dr. Fite is board-certified in both Pain Management and Anesthesiology. He earned his MD at the University of Texas, Houston Medical School. Dr. Fite finished his Anesthesiology Residency at the University of Alabama Birmingham before completing his year long fellowship-training in Pain Medicine. Dr. Fite is a member of the American Society of Anesthesiologists, Texas Society of Anesthesiologists, Texas Pain Society and other professional organizations.

**Duane "Lee" Griffith, MD, FIPP**

Board-certified Anesthesiology & Pain Management, Fellowship-trained Interventional Pain Management

Dr. Griffith's special interests include spinal cord stimulation and intrathecal pump delivery systems. In fact, Dr. Griffith teaches and trains other physicians on Spinal Cord Stimulation and Intrathecal Pumps in conjunction with the Medtronic Fellowship Program. Dr. Griffith was selected by his peers as an outstanding practicing doctor in Texas. After an extensive nomination and research process conducted by Key Professional Media, Inc., the results were published in Super Doctors Rising Stars, a special advertising section in the Texas Monthly.

**Mark Hackbarth, MD, FIPP**

Board-certified Anesthesiology  
Fellowship-trained Pain Management

Dr. Hackbarth has devoted his practice to the specialization of pain medicine and spinal care for over 20 years. He has a special interest in regenerative care and other advanced techniques to give better and longer lasting relief in those patients suffering with pain. He was the first physician in Arkansas to implant an occipital stimulator for headache pain. He was one of the leading physicians in Texas to use multi-probe cold radiofrequency for lumbar facet pain. Dr. Hackbarth was one of the first physicians in Texas to use platelet rich plasma for pain disorders, and it was reported that he was the first in Texas to use autologous stem cells for treatment of the lumbar disc.

**Joshua D. Toby, MD**

Board-certified Anesthesiology

Dr. Toby has experience working a broad spectrum of surgical cases in a 500+ bed level trauma hospital. He is an active member of the neurosurgical anesthesia team in addition he serves on the hospital's perioperative regional anesthesia pain team. He then earned his MD degree at Texas A&M College of Medicine in College Station. Dr. Toby completed his transitional internship at Tucson Hospitals Medical Education Program and his residency in anesthesiology at the University of Arizona.

**James Michael Wages, MD, FIPP**

Board-certified Anesthesiology and Pain Management, Fellowship-trained in Interventional Pain Management

Dr. Wages attended medical school at University of Texas Health Science Center in San Antonio and completed his Anesthesiology Residency and Pain Management Fellowship at Washington University in St. Louis. A goal of Dr. Wages is to develop a practice that will work in concert with local physicians to provide the community the best health care possible. He believes that each patient and pain condition is unique and in order to optimize patient care, therapy and treatment must be tailored appropriately for each patient.

included in SpineCenterNetwork.com — the only national listing of credentialed spine centers. This accolade makes Precision Spine Care one of only two spine centers in the State of Texas to meet the credentialing criteria of having board-certified spine surgeons; physical medicine and pain medicine physicians; an emphasis on non-surgical capabilities; and clinical outcome reporting.
